

Low Poly Vehicle Starter Pack

Free sample edition of Low Poly Cozy Village Vehicles Pack

Overview

A collection of three stylized low-poly models for cozy villages, town streets, farmyards and countryside scenes. The pickup, scooter and wheelbarrow share cute proportions, chunky shapes and textureless flat-color materials.

This package contains the same three models available in **Low Poly Cozy Village Vehicles Pack**. It provides a free sample of the full pack's visual style and assets. See the edition comparison on page 2 for the complete content breakdown.

Included models

Model / prefab	Triangles
Pickup_Base	8,204
Scooter_Body	8,185
Wheelbarrow_Body	3,169
Total	19,558

Technical details

Property	Value

Model format	FBX
Average triangle count	Approximately 6,519 per model
Triangle range	3,169-8,204 per model
LODs	Not included
Animation clips / rigging	Not included
Recommended scale	1 Unity unit = 1 meter

Materials and textures

All models use **textureless flat-color materials** that can be recolored in Unity. No external image textures are required. UV mapping is not required for the included materials; texture dimensions are not applicable.

No albedo, normal, metallic, roughness, ambient occlusion, emission or other image texture maps are included.

Setup and Editions

Low Poly Vehicle Starter Pack

Getting started in Unity

1. Import the package into your Unity project.
2. Locate the included prefabs in the Project window.
3. Drag Pickup_Base, Scooter_Body or Wheelbarrow_Body into your scene.
4. Adjust their placement and material colors to match your environment.

The models can be used as scene props or connected to your project's movement and interaction systems. No animation clips or LOD meshes are included.

Free and full edition comparison

Free edition: Low Poly Vehicle Starter Pack - 3 models.

Full edition: Low Poly Cozy Village Vehicles Pack - 11 assets / asset sets.

Asset / asset set	Free edition	Full edition
